

Equipment Installed:

Lighting Circuits	x320
Source Controllers	x65
Control Panels	x12
Colour touchscreen	x2
Relay interface	x2
Network Bridge	x2

Supplied By:

Sislite

Lighting Designer:

Elektra Lighting Ltd

The Hilton Hotel Vilamoura is a luxury hotel complex set within the beautiful scenery of the Portuguese Algarve region.

Lighting controls for the hotel are provided using an iLight CANbus lighting control network throughout the public areas.

Controlled areas include the restaurants, bars, ballrooms, meeting rooms and public spaces such as lobbies and corridors. The spacious main lobby also features photocell control for minimising energy usage on bright days.

Colour touchscreens are included in the lighting network to allow staff to remotely select lighting scene setups for the meeting rooms. This saves time having to go to each room to set the lighting in advance. Relay interfaces incorporate screen, blind and curtain control into the lighting network for an integrated solution.
