Overview

Enterprise Operate is a software package for the control and operation of iLight lighting control systems.
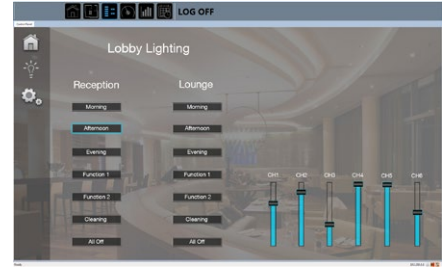

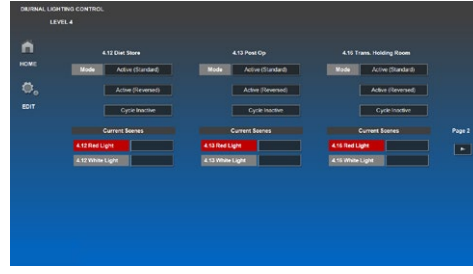

Enterprise Operate is designed to give powerful user control through a simple intuitive customised graphical interface. Actions may be manually controlled or scheduled for specific day/dates and times using the powerful astronomical timeclock scheduler.

Operated using any PC monitor, touchscreen or PC integrated tablet, Enterprise Operate is an ideal way to simplify the operation of lighting in any installation.
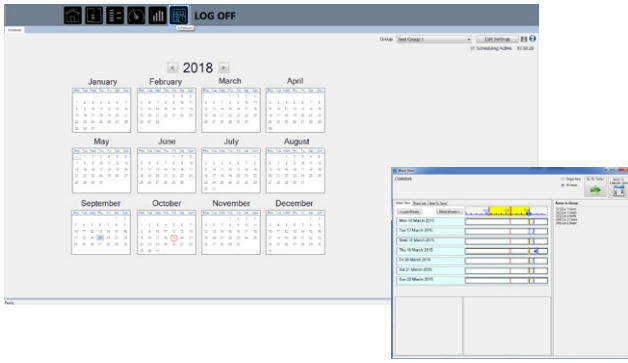

Enterprise Operate is fully compatible with iLight PlanView if floor plans are required for your project.

Operate

Event Scheduler

Compatble with iLight PlanView

PlanView provides instantaneous access to the operation and health of an iLight lighting control system.

Building managers, operators and end users can control one or more sites, monitoring multiple buildings, floors and individual areas as well as the hardware components of the system at varying levels of granularity.

Users are empowered to make changes simply and efficiently, proactively managing the built environment for the benefit of the occupants.
